

# CI/CD Deployment for Springboot Application

Submitted by:M.Varun Apesh

Email:m.vas.18.me@anits.edu.in

## SOURCE CODE

**Src/main/java/com/SpringTest/SpringApplication.java:**

```
package com.SpringTest;

import org.slf4j.Logger;
import org.slf4j.LoggerFactory;
import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;

@SpringBootApplication
public class SpringJenkinsApplication {

    public static Logger log =
LoggerFactory.getLogger(SpringJenkinsApplication.class);

    public void init() {
        log.info("Spring Boot Application Started.....");
    }

    public static void main(String[] args) {

        log.info("Application Executed .....");
        SpringApplication.run(SpringJenkinsApplication.class, args);
    }
}
```

**Src/test/java/com/SpringTest/SpringApplicationTest.java:**

```
package com.SpringTest;
```

```

import org.junit.jupiter.api.Test;
import org.slf4j.Logger;
import org.slf4j.LoggerFactory;
import org.springframework.boot.test.context.SpringBootTest;

@SpringBootTest
class SpringJenkinsApplicationTests {

    public static Logger log =
        LoggerFactory.getLogger(SpringJenkinsApplication.class);

    @Test
    void contextLoads() {

        log.info("Spring Test Case Executing.....");

    }

}

```
